Subject: RE: Pond D Toe Drain Sampling Results

Mike,

Idea for your consideration---To cut off French drain systems at other facilities I dug to top of drain and drove in a guillotine...then I dug a trench ahead of guillotine and placed a concrete barrier to stop flow...it was cheap, easy and quick.

After flow is stopped you can dig out French drain rock or pipe and back fill with structural fill w/ clay binder.

Dale

Subject: RE: Pond D Toe Drain Sampling Results

Scott,

The results look good for the toe-drain. Based on the pending permit though we will have to redirect this flow back to the D pond. Would you be able to come up with a quick design that is agreed to by PGE so Glover Construction can install. I think we will have a little time after the water board meeting to implement, but we will need to move as quickly as possible.

Thanks,

Mike Glagola

Ken:

As requested, the table has been edited and a copy attached for your use. We will continue to update the table as additional sampling data is received. Let me know if you need anything else. Thanks.

Sincerely,

Scott C. Quinlan, PE

Scott,

I think we should change the title of the table to "Possum Point Toe Drain compared with Draft Limits for Outfall 010". I think we should also change the column heading "Pond D Outfall 010" to "Pond D Toe Drain". Outfall 010 consists of both the toe drain and stormwater, and these data are for the toe drain only.

Ken

All:

As discussed during our call today, I have attached the initial round of sampling results for your review. Contact me if you have any questions. Thanks.

Sincerely,

Scott C. Quinlan, PE
